

Stanford Health Care Alliance is a model of care centered on you, with an emphasis on coordinated and personalized care.

Personalized, Quality and Coordinated Care

Your Health Care Partner

A primary care physician (PCP) will be your dedicated personal doctor. From annual physicals to serious health challenges, your PCP will get to know you, your health goals and medical history.

Access to Specialists

When needed, your PCP will refer you for appropriate specialty care. No referral is needed for behavioral health, well woman, chiropractic or acupuncture services.

Support from Care Management

If you have a new diagnosis or a chronic condition, our nurse care managers are here to provide additional support. They will partner with you and your PCP to coordinate services and help you navigate and understand your care.

A Broad Network and Many Ways to Access Care

- 700+ primary care doctors and pediatricians
- 2,700+ specialists from Stanford Medicine and affiliated network
- 3 Stanford hospitals and select community hospitals
- In-person and video visits, Express Care Clinics, Walk-In Clinic, and adult/pediatric urgent care

Member Care Services

You have a great resource available with our Member Care Services team. They are available to answer your questions about the plan, including benefits and member cost share, and can assist in finding a doctor that's right for you.

To contact our Member Care Services, call:

1-855-345-7422

Monday–Friday | 6:30am–7:00pm PST
